Program Overview

The Neurology Medicine Program is primarily located at Palmetto General Hospital in Hialeah Florida. Each rotation is 1 month (4 weeks) in length over four years, with one year being primarily Internal Medicine. Throughout the duration of the program, residents will complete one half-day a week of continuity clinic experience thus exposing them to a diverse patient panel. Residents will complete at least 40 half day sessions of continuity clinic per year throughout their training and be immersed in several disciplines of Neurology.

Neurology Residency Block Schedule

Program Participating Sites

- 1- Palmetto General Hospital - Inpatient Neurology, Neuro Consult, Outpatient Neurology, Neuro ICU, Adult Emergency Medicine, Electroencephalography (EEG), Electromyography (EMG), Clinical Psychiatry, Neuroimaging
- 2- Kidz Medical Services - Pediatric Neurology

Required Rotations:

During the first year of the program, Neurology residents will work with an Internal Medicine attending primarily, with exposure in emergency medicine. Residents will begin their rotations for inpatient neurology with our core faculty. Palmetto General Hospital's Neurology attending will be the primary care provider when neurology-related patients arrive to the Hospital. The resident will work alongside the attending and his/her team for admission, discharge, writing orders, and follow up for the patient for their required inpatient rotation. For Neuro consults, the attending and resident will provide guidance to other primary services separate from the inpatient neurology patients on their service. Continuity Clinic will occur at the clinical office of Dr. Jose Simon Canellas at Simon, MD, PA .

Electives

For rotations listed as "Elective" on the block schedule, residents may select from a list of clinical experiences on either the inpatient or outpatient setting. Elective options include: EEG, EMG, Psychiatry, Pediatric Neurology, Neuroimaging, Neurosurgery, Neuroophthalmology, Pain Management, Neuropathology, Neuromuscular, Infectious Disease, NICU, Neurogenetics, Neuropsychology, Interventional Neurology, Sleep Disorders Clinic, Movement Clinic and Vascular Clinic. Residents will be allowed to take vacation days during their elective rotation months and on specific core rotations upon approval of the Program Director.
